

HENOK ANIL ANTON

Computer Science & Engineering

Kollam, Kerala, India | linkedin.com/in/henok-anil-anton | github.com/HenokAnil | henoknil13@gmail.com

PROFILE SUMMARY

Motivated Computer Science and Engineering undergraduate at MBCET with a strong foundation in software development, artificial intelligence, and data-driven problem-solving. Proven ability to contribute in international research environments and deliver under pressure in competitive settings. Experienced across the full project lifecycle — from ideation and prototyping to deployment — in domains spanning AI/ML, mobile, and enterprise web development. Actively developing expertise in agentic AI, prompt engineering, and modern development frameworks. Brings rigorous analytical thinking, adaptability, and a commitment to excellence to every team and challenge.

EDUCATION

Mar Baselios College of Engineering and Technology (MBCET), Thiruvananthapuram <i>B.Tech in Computer Science and Engineering (3rd Year)</i>	2023 – Present
Sree Narayana Public School, Kollam (CBSE) <i>Class XII — Score: 91%</i>	2023
Trinity Lyceum, Kollam <i>Class X</i>	2021
Progressive English School, Sharjah, UAE <i>Primary & Middle School</i>	

PROJECTS

Event Reconstruction Using Semantic Graphs | Python, Electron.js, JavaScript

- Built a threat-analysis model that reconstructs cyberattack timelines by constructing semantic graphs from log data, extracting entities and relations to surface attack vectors and origin paths.
- Designed to support security analysts in understanding complex, multi-stage attack sequences through structured, interpretable graph visualisations.

ALAKA — Authenticated Lifecycle & Audit for Knowledge Assets | Java, JavaScript, CSS | Hackathon Project

- Engineered a Java-based enterprise document-management platform delivering authenticated lifecycle controls, end-to-end audit trails, and access governance for organisational knowledge assets.
- Architected with an emphasis on compliance readiness and traceability — qualities directly aligned with enterprise risk and assurance frameworks.

AI-Powered Resume Scanner | Python, NLP

- Developed an intelligent resume screening tool leveraging NLP to parse and evaluate candidate profiles against job requirements, reducing manual screening effort and improving match accuracy.

AyurSutra — Ayurveda-Focused Healthcare Platform | React | Hackathon Project

- Designed and built a full-stack digital platform connecting Ayurvedic practitioners with patients, developed end-to-end under competitive hackathon constraints using React.

Smart Alert System for Natural & Manmade Disasters | Figma, HTML, CSS | Hackathon Project

- Prototyped and developed an early-warning alert system with a focus on rapid, accessible notification delivery for both natural and manmade disaster scenarios.

Waste Classification Model | Python, Machine Learning

- Trained a machine learning model to automatically classify waste into recyclable categories, supporting data-driven waste management and sustainability initiatives.

EXPERIENCE & TRAINING

Virtual Research Intern — Decentralized Big Data Team, RIKEN, Japan

Dec 2025 – Mar 2026

AiP | MBCET × RIKEN Collaboration | Flutter / Dart

- Contributed to the Personary app by designing and implementing Undo/Redo functionality and Hypernode features, directly enhancing usability and reducing user error in a production application.
- Integrated UI components using Flutter (Dart), adapting rapidly to an unfamiliar framework within a remote, international research setting — demonstrating strong self-direction and cross-cultural collaboration.

Project-Based Learning Intern — IBM SkillsBuild

Jul – Aug 2025

CSRBOX Foundation | Agentic AI: From Learner to Builder

- Completed an intensive programme covering the full lifecycle of building production-ready AI Agents — from architecture design through to deployment.
- Acquired practical experience with agentic AI frameworks and applied them to real-world problem scenarios, strengthening skills directly relevant to enterprise AI adoption.

HACKATHONS, COMPETITIONS & EVENTS

- **Smart India Hackathon 2026 (SIH) — Prelims Qualifier** — MBCET, Team Palimpsest · Aug 2026
- **Smart India Hackathon 2025 (SIH) — Prelims Qualifier** — MBCET, Team Ninja Coders · Sep 2025
- **National AI/ML Hackathon by AVEVA — YUVAAN** — IIT Hyderabad · 2024
- **GDG on Campus Solution Challenge** — Google Developer Groups / Hack2skill · 2025
- **Unity Unbound: Game Development Workshop** — College of Engineering Trivandrum (DotSlash) · Dec 2023
- **CODIGO: Coding Quiz Competition** — MBCET · Feb 2025
- **Student Volunteer — FDP on Universal Human Values II (AICTE)** — MBCET · Jul 2025

CERTIFICATIONS & COURSES

- **Programming, Data Structures & Algorithms Using Python** — NPTEL – IIT Madras (Elite) (Score: 66%) · Jan–Mar 2026
- **Advances in Strategic Human Resource Management (HRM)** — NPTEL – IIT Bombay (Elite) (Score: 65%) · Jan–Feb 2026
- **Agentic AI: From Learner to Builder** — IBM SkillsBuild / CSRBOX · 2025
- **Beginning Python** — Infosys Springboard (Wingspan) · Apr 2024
- **Java Programming** — Infosys Springboard (Wingspan) · Sep 2024

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, TypeScript, HTML, CSS

Frameworks & Tools: React, Flutter (Dart), Electron.js, Git, GitHub

AI / ML: Machine Learning, Natural Language Processing, Agentic AI, Prompt Engineering

Domains: Software Development, Data Structures & Algorithms, Cybersecurity Analysis, UI/UX Development

Languages Spoken: English (Fluent), Malayalam (Native)
